ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

From the 1893 through the 1905 Sanborn maps, a two-story frame dwelling was located on this property. The water was purportedly discovered by the property owner, Thomas McMullin, in 1833-'84, and was first used as his family's private water supply. In 1902, the city clerk certified the water's analysis completed by P. Schweitzer, chemist from the University of Missouri (listed below). In 1906, Thomas McMullin subdivided a portion of the Original Town plat as "McMullin's Addition," likely with plans to develop the property commercially. By 1909, a new two-story frame commercial building had replaced the dwelling. In April of that same year, the *Daily Call* reported on the opening of McMullin's Lithia springs pavilion. McMullin converted the store room into a pavilion by adding a stone veneer arch to the first floor of the frame commercial building. The office building/pavilion is shown below in the 1913 Sanborn. A ten foot platform/deck had been built on the rear of the building, facing the Fishing River, likely for the spring water customers. The "Lithia Spring No. 1" well at 245 E. Broadway was listed in the 1917 and 1922 City Directories. The water was in the *Calcium Bicarbonate (lithia)* group. Postcards advertised that it was "Absolutely Pure. Cures rheumatism, kidney, stomach and prostatic trouble. Shipped to any part of the world." Lithia #1 Spring was one of the ten waters purchased by the city and subsequently piped into the Hall of Waters. The building was destroyed by fire in the 1930s, and the lot has been vacant since that time. The city recently constructed a frame gazebo to commemorate the site of the Lithia #1 spring. The concrete & limestone stairs and well pad were listed as contributing resources in the Hall of Waters East National Register district.

1913 Sanborn Map

Lithia No. 1 Analysis	Salts in Solution in Grains Per Gallon
Calcium Bicarbonate	30.9393
Lithium Bicarbonate	2.3014
Magnesium Sulphate	2.7574
Silica	1.2149
Sodium Chloride	4.0770
Sodium Sulphate	4.4099
Mineral Matter	47.4869
Carbon Dioxide Escaping	5.6600
Fixed Residue	41.8269

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The sloping lot is bounded on the west side by concrete steps leading down towards the Fishing River. The stair balustrade is squared ashlar limestone with a concrete coping. The historic well pad is beneath the gazebo, which is approximately 30-35' from the sidewalk edge. Between the gazebo and the sidewalk are raised planters set within a stone terrace. The ground drops off steeply to the south below the gazebo. The narrow lot is currently addressed as 000 E. Broadway by the county assessor's office, Lot 1 McMullin's Addition, Clay County parcel ID: 12-311-00-23-008.00

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

The octagon shaped wood gazebo is set on a concrete foundation, and is reached by wood steps on the northwest. The bellcast pyramidal roof is supported by turned spindle posts and has spindle-work frieze with flat brackets beneath the eaves. The square wood baluster rails have flared caps and bases.
